

2026 EXHIBITION JUDGING CRITERIA

Project Video Presentation

This is aligned with the project video submitted by the students.

Score Set	Score Description	
Video Intro and Scope	Clarity of introduction and background and appropriate scope of presentation.	5 = The motivation for the research is completely clear and effectively presented. The introduction immediately captures the attention of the viewer. 4 = The introduction clearly demonstrates the motivation for the research and the viewers' attention is held 3 = The introduction states the motivation for the research but does not inspire the viewer. 2 = A basic effort has been made to describe the motivation. 1 = The introduction is uninspiring and the motivation poorly described.
	Conciseness, accuracy, and effective communication of the project details	5 = A clear and logical argument runs throughout the presentation. 4 = A clear and logical argument runs throughout the presentation, but there are minor digressions. 3 = The presentation is logically structured on the whole, but there are some serious digressions. 2 = There are major digressions in the case presented by the student. 1 = There are serious flaws in the expostulation.
Project Visuals	Video production standard and demonstration of equipment displayed.	5 = The production standard is exemplary with evidence of complete attention to detail. 4 = The production standard is excellent with only minor shortcomings. 3 = The production standard is good 2 = The production standard is acceptable, but a few things are unclear 1 = The production standard is generally poor, with many things confused or unclear
Project Understanding	Student's understanding, scientific accuracy and logical argument.	5 = The student(s) demonstrates complete mastery of the underlying science. 4 = The student(s) demonstrates a good grasp of the underlying science, but there are minor errors. 3 = The student(s) demonstrates an acceptable grasp of the underlying science, but with some errors. 2 = The student(s) demonstrates a poor grasp of the underlying science, although there are moments of clarity. 1 = The student(s) demonstrates a poor grasp of the underlying science

+ MISSION

Inspire and empower the next generation of young scientists, innovators and entrepreneurs to transform their local and global communities through STEM

Project Report Book

This is aligned with the project report book submitted by the students.

Score Set	Score Description	
Research Question	Scope and clarity of introduction, background and literature cited.	5 = The report describes research which makes a good contribution to the field. 4 = The report is mostly concise and largely avoids superfluous detail. Most of the relevant literature is cited with only minor omissions. 3 = Some of the relevant literature is cited, but there are significant omissions. 2 = Some of the relevant literature is cited, but there are significant omissions. The report demonstrates little knowledge and understanding. 1 = Very little of the relevant literature is cited.
Design and Methodology	Effective motivation. Accuracy and clarity of science. Level of knowledge and understanding of concepts.	5 = The motivation for the research and the background science are described clearly and comprehensively with only minor errors. 4 = The motivation for the research and the background science are adequately described, but clarity is lacking. 3 = The motivation for the research and the background science are poorly described. Some of the relevant literature is cited, but there are significant omissions. 2 = The motivation for the research and the background science are poorly described. 1 = The motivation for the research and the background science are completely lacking.
Data and Results	Data Collection, Analysis and Interpretation	5 = The data analysis and interpretation are very good with only minor errors. 4 = The data analysis and interpretation are generally good, but there are some errors. 3 = There are significant errors in the data analysis and interpretation. 2 = There are significant errors in the data analysis and interpretation. 1 = The data analysis and interpretation is largely incorrect.

Presentation of Report	General presentation of the project report book	5 = The style and production standard of report are exemplary with only minor shortcomings 4 = The style and production standard of report are appropriate, but there are minor shortcomings. 3 = The style and production standard of report are appropriate, but there are major shortcomings. 2 = The style and production standard of report fall below the acceptable. 1 = The style and production standard of report fall far below the acceptable.

Project Information

This is aligned to the student's written submission of the project solution and conclusion.

Score Set	Score Description	
Solution - Originality	Scope and clarity of introduction and background.	4 – Original research; unique question. 3 – Originality of approach, handling of materials, or ingenious use of materials 2 – Unique perspective on a traditional project. 1 – Embellish an existing idea.
Solution - Feasibility	Quality of idea for further research	4 – Project is realistic and has a high chance of success. 3 – Project may be feasible depending on several unknown factors 2 – Project will need a slight change to be feasible 1 – Project is not feasible; it is expensive & requires a government intervention
Conclusion – Innovation & Social impact	Recognition of creativity and potential impact in science, society and/or economics	4 – Project improves an existing solution in a novel way & has high impact 3 – Project addresses a social need in a better way than existing solutions 2 – Project addresses a social need indirectly 1 – Project idea does not address a social issue

+ MISSION

Inspire and empower the next generation of young scientists, innovators and entrepreneurs to transform their local and global communities through STEM

**Young
Scientists
Kenya**
