

13 May 2026

Our Ref No: YSK/428/5/2026

TO:

The Chief Principal,
Kianyaga High School,
Kirinyaga County, Kenya.

Dear *Chief Principal,*

RE: SELECTION TO PARTICIPATE IN THE 2026 YSK NATIONAL SCIENCE AND TECHNOLOGY EXHIBITION

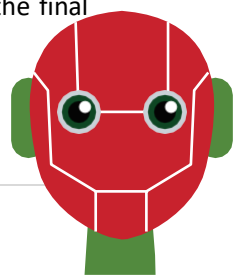

With reference to the project, **Fashion Fit: AI-Powered Wardrobe Digitization and Context-Aware Outfit Recommendation**, submitted by **Jeremy Gachiki Nduati** and **NONE**, under the guidance of **MR AUSTINE ADEM** in the **Technology** category, we are pleased to inform you that **Kianyaga High School** has successfully qualified to participate in **Round 2** of the **9th Edition of the Young Scientists Kenya (YSK) National Science and Technology Exhibition (NSTE)**.

Young Scientists Kenya (YSK) is a national platform that brings together young innovators from all 47 counties across Kenya to showcase their creativity, scientific inquiry, and innovative solutions to real-world challenges. YSK is modelled after the internationally acclaimed Young Scientist & Technology Exhibition in Ireland and continues to foster a strong culture of research, innovation, and STEM learning among students in Kenya. The centrepiece of the program is the annual National Science and Technology Exhibition, where selected student teams showcase their projects at the national level competing for the Young Scientists of the Year award and a trip to Ireland in January 2027.

As part of Round 2, participating students are required to further develop and finalize their projects before submitting the required project materials for evaluation. Schools and teams may also, upon request, receive mentorship and practical guidance to support project improvement and preparation for their final project submission.

The Round 2 evaluation process will take place in July 2026, after which the top 130 finalist teams will be invited to Nairobi to physically exhibit their projects during the National Exhibition scheduled for **5th – 8th August 2026**. Additional event details will be shared with the finalists in good time to support planning and preparation.

Participating teams are kindly requested to complete their projects and submit all required materials by **21st June 2026** to facilitate the Round 2 evaluation process. Attached is a guideline outlining the required submission materials and formats. Kindly ensure that all submissions strictly adhere to the provided guidelines, as the final exhibition materials will be produced directly from the information submitted.

Kindly share the supervising teacher's contact for addition to the YSK 2026 Qualifiers' Group.

Congratulations once again on qualifying for Round 2. We look forward to receiving your submission and following your innovation journey

Yours Sincerely,

Mrs. Vanessa Inziani
Head of Programs
Young Scientists Kenya
